Lean Visual Management Solutions

USA Manufacturer of Whiteboards & Notice Boards

www.magiboardsusa.com

sales@magiboardsusa.com | (888) 393-7795

Your Visual Management Partner

Founded in 1966, Magiboards is a proven manufacturer of whiteboards, custom printed whiteboards and lean visual industrial stands.

Now manufactured in Broomall, PA to the exacting standards in place in the UK

Lean visual management boards are vital to allow you to fully implement your Continuous Improvement (CI) project and fully engage the knowledge and experience of the people involved in the process.

You may be at the start of your lean journey or you may be introducing new methodologies.

Magiboards understands that different board solutions will be necessary for different stages and companies. That is why we have shown the various development phases of visual management boards and how to build your whiteboard to suit you.

See page 12.

Implementing your continuous improvement plan is one thing, but we all know that sustaining the improvement is the most challenging. That is why we recommend the use of whiteboards over digital solutions in areas where the buy-in of experts reacting with the process on a daily basis will ensure the ongoing success of the project. It is the experts on the shop floor who will drive through the change. Let them take control of the visual control systems.

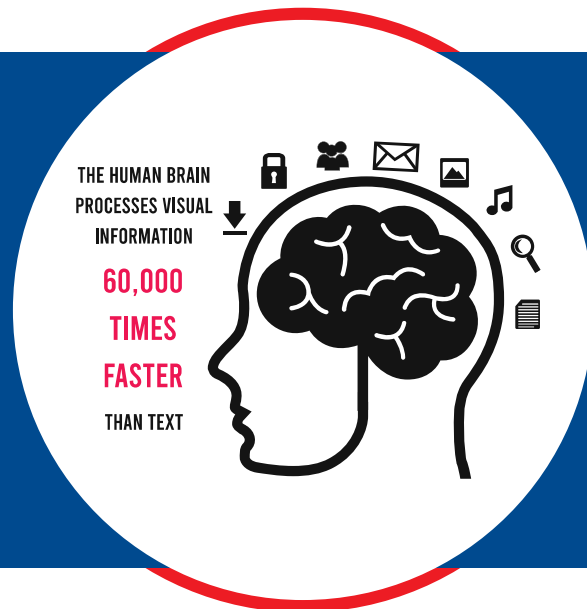

As a manufacturer, we can produce standard and custom solutions. We manufacture everything from wall mounted whiteboards to full Obeya rooms and everything in between!

It is of course often the CI board accessories which bring the boards to life. We offer the full range of document holders, magnetic indicators, custom printed magnets and headers to make your project a success.

Finally our in-house graphic design team will work with you tirelessly producing to scale PDFs of your designs before production, helping you to develop the visual management products you need to run your business more effectively and profitably.

FACT People process visuals up to 60,000 times faster than text. We remember on average 20% of what we read and 37% of visual images we see. Visuals often immediately provide the context that we otherwise need to provide with text. Visuals bring a concept to life. Project planning involves planning of the time dimension, interrelationships between tasks, priorities, objectives, deadlines, bottlenecks, etc., all of which become clear in an instant if made visual. We immediately associate the use of the color red, exclamation points and traffic lights with urgency, risk, danger and attention.

Here's why you should choose Magiboards:

We are a proven manufacturer of whiteboards, custom printed whiteboards and lean visual industrial stands.

We understand the need for you to develop your visual management systems. We offer a variety of product options from testing to implementation to replacement.

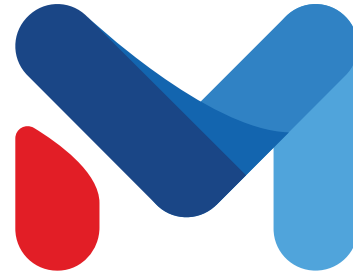

Our in-house graphic designers will work with your team, supplying visuals to scale with size dimensions and everything you need to reassure you that your design will work.

Years of experience working with CI professionals and vast galleries of examples to share with you.

SQDC Boards

SQDC is a daily process management tool for quickly providing a visual assessment of how the process is operating, based upon 4 main criteria: Safety, Quality, Delivery, Cost and often People & Environment (SQDCPE).

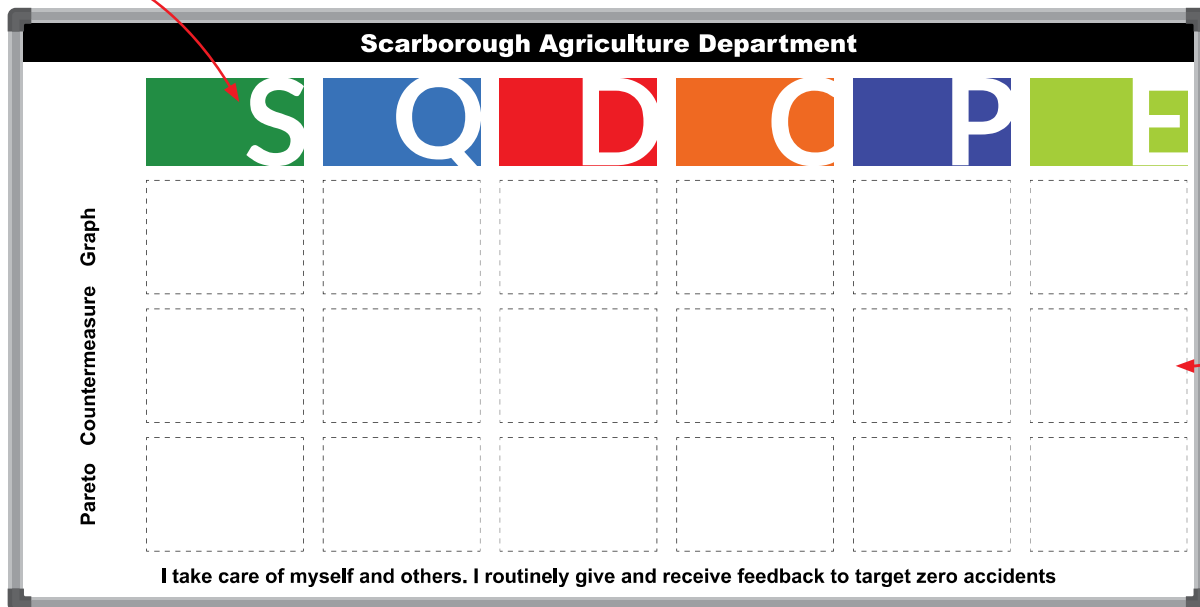

SQDC boards give an immediate visual of how an area is performing. You apply safe working practices with a key. For example, on the Safety Cross you could have **green** for No Incidents, **yellow** for a Near Miss or First Aid, **red** for Medical Treatment, Restricted Duty or Lost Time Injury and a **red** Exclamation point for Upcoming Test / Associated risks. It is also advisable to record incidents this month and this year and days since last recordable injury. Recordings can be made by using dry erase marker pens, colored magnetic squares, magnetic indicators or colored face magnets.

Color coordinated headings

Example SQDCPE board design

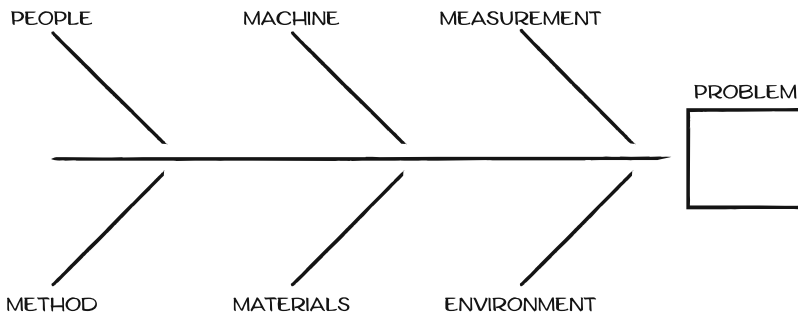

Root Cause Analysis Boards

Root Cause Analysis, such as 5 WHY, Cause and Effect diagrams, Fault Tree Analysis, Flowcharting, all aim to identify, analyse and implement corrective actions to solve a problem. The problem solving process is reviewed to understand the lessons learned in order to achieve further improvement within the business.

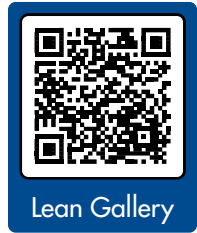

A **fishbone** diagram, also called a cause and effect diagram or **Ishikawa** diagram, is a visualisation tool for categorizing the potential causes of a problem in order to identify its root causes.

Also popular are the 5 WHY boards which identify the causes for a problem, identify a solution and estimate the saving to the business on the bottom line.

Example Root & Cause Analysis 5 WHYS board design

5 WHYS - OAKTHORPE					
DATE:	TEAM:	SHIFT:	DEPT:	AREA:	
What is the problem?			When does/old the problem occur?		
Who found the problem?			Why is it a problem?		
Where does the problem occur?			How does it affect us?		
Is there a temporary fix to put in place now?					
MAIN CAUSE OF PROBLEM?					
1st Why?	Reason for above		Reason for above		
2nd Why?	Reason for above		Reason for above		
3rd Why?	Reason for above		Reason for above		
4th Why?	Reason for above		Reason for above		
5th Why?	Reason for above		Reason for above		
Most effective solution(s) to root cause?	Action		Action		
	Responsible:	By Date:	Responsible:	By Date:	
5 Why status:	OPEN		ANALYSIS COMPLETE	CLOSED	
Sign Initials and date:	1 Why not yet completed or reviewed.		2 Why complete, correct still outstanding.	3 All analysis and actions complete.	

For Products, See Page 17

5S Boards

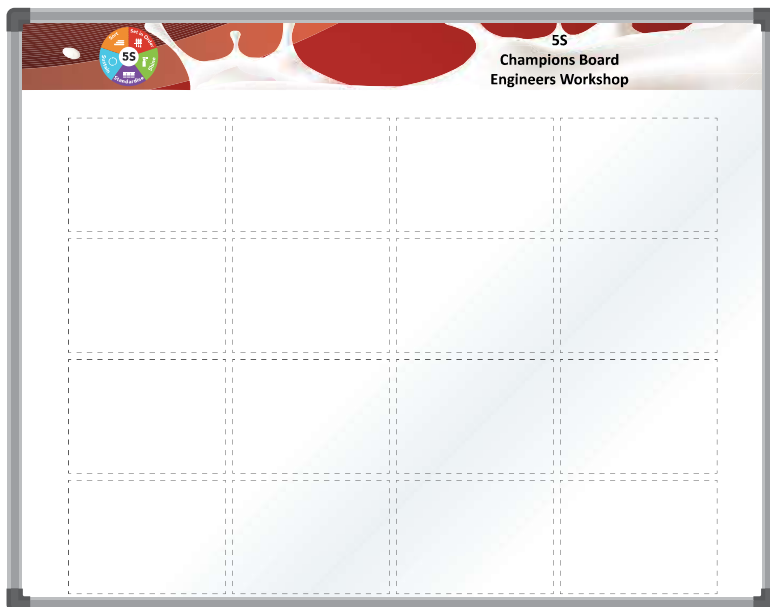

5S Boards consider the work area and its activity to determine where information, materials, tools and/or equipment are missing or require a new location and what improvements can be made to the area or activity. In short - A place for everything and everything in its place.

5S is a 5 step technique to stabilize, maintain and improve the best working equipment to support sustainable QCD (Quality, Cost, Delivery)
Sort, Set in order, Shine, Standardize, Sustain.

Example 5S board design

Continuous Improvement Boards

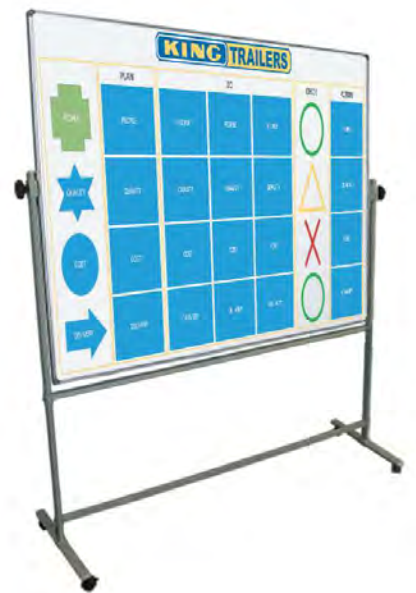

Kaizen Boards identify and confirm waste, problems or conditions within the work area or activity and what improvements can be made.

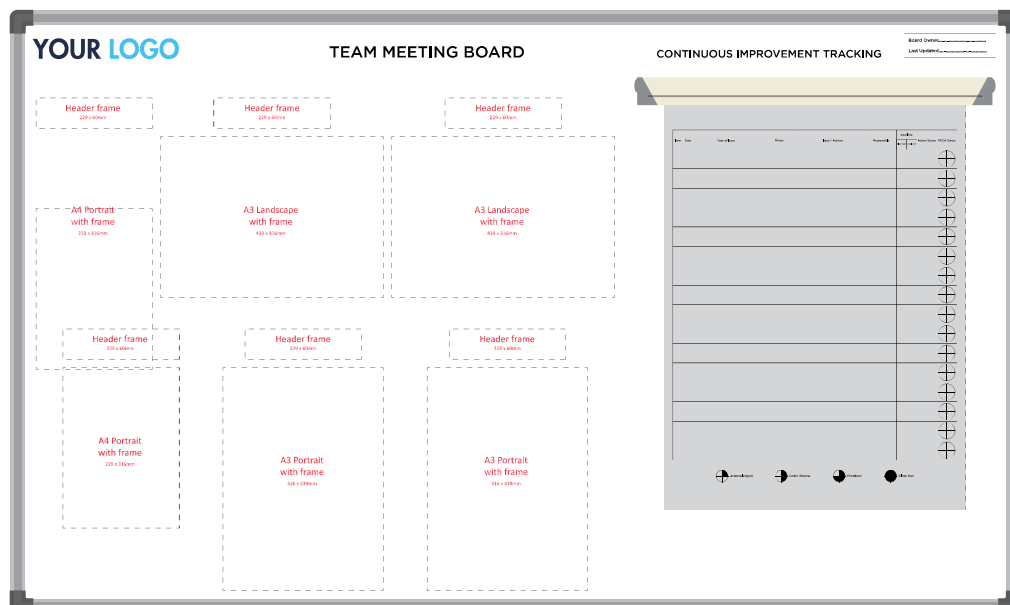

Plan the Kaizen process for the agreed area/activity to include Plan, Do, Check, Act + quantifiable objectives and targets for the improvement activity. This is known as the Deming Cycle.

The eight wastes (MUDA) are:
Over-Production, Inventory, Transport, Over-Processing, Waiting Time, Operator Motion, Bad Quality and failure to exploit human potential.

Activities which would give business benefits can be reduced product cost, increased capacity, improved safety, quality, compliance, customer service, reduction in lead time and elimination of waste.

Example Deming Cycle board design

Production SIC Boards

Short Interval Control boards allow for quick and focused reviews of performance data during the shift which enable you to make mid-course corrections and immediate small-scale fixes that collectively result in significant improvements in performance.

Short Interval Control (SIC) is a structured process for identifying and acting on opportunities to improve the effectiveness and efficiency of production. It is a factory-floor process that engages team members to review performance data three or four times within their shift to assess where they need to focus their efforts to improve performance.

A key feature of SIC is the use of real-time production data to guide instantaneous front-line decision making. Teams are trained to collect, analyze, and react to this data in order to drive significant performance improvement from the factory floor.

Example Production SIC board design

Can Line Hourly SIC Board											
Time	Product	Can Size	Filler Standard Run Rate (CPS)	Hourly Target (CPS) from Sheet 2	Actual CPS	% OEE Achieved *Plant Status	Downtime Top 3's	Action Taken to Improve Next Hour	From Initial	To Initial	Feedback / Close Out

Health, Safety and Environment Boards

Many companies like to have a specific **Health and Safety** in addition to the usual SQDC board.

Health & Safety Notice Boards can include notices on Health & Safety Policy, Site Rules, Insurance Policies, First Aid Information, Permits and Inductions. This is very much led by the Health and Safety Officer.

THIS MONTH	THIS YEAR	1	2	We're Thinking and Working SAFELY Every Day™			
		3	4				
DAYS SINCE LAST RECORDABLE INJURY		5	6				
		7	8				
9	10	11	12	13	14	15	16

		27	28	Near Miss or First Aid	[Yellow Box]		
		29	30	Medical Treatment, Restricted Duty or Lost Time Injury	[Red Box]		
		31		Upcoming Tests / Associated Risks	[Warning Sign]		

Example Health, Safety and Environment board design

Safety crosses play a pivotal role on Health & Safety boards. We can supply a safety cross or any custom design on a dry erase magnetic sheet with a magnetic backing, to offer you the option of a removable magnetic safety cross, usable with magnets and dry erase whiteboard marker pens.

This is a great option for creating a flexible working or test phase visual management board. See page 41.

The Options to Create your Lean Boards

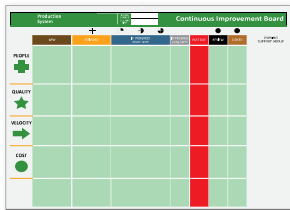

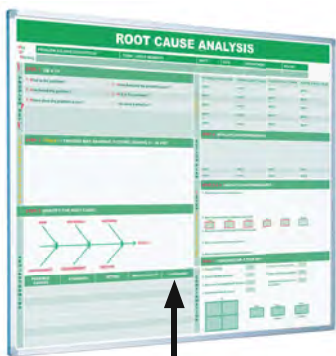

Maximum Impact

↳ Fully Custom Printed Whiteboard

You and your team have decided on a design for your lean whiteboard. Based on your mock up, Magiboards will optimize your design graphically and come back with a digital proof for your team to discuss, amend and ultimately approve.

Benefits

- + Fully custom printed whiteboard gives a totally professional finish
- + Totally smooth surface with no overlays - Ideal for the food industry
- + Designed by you in partnership with our in-house design team
- + Can be updated with replacement sheets. See below.

Need to change a board?

↳ Replacement Whiteboard Sheets

Your processes, methods and organisation will improve continuously and with that your Visual Management Tools will need to be updated. We offer a newly designed printed whiteboard sheet, complete with a magnetic backing, which simply sits on top of the old one. This will save costs, while retaining the same high quality Visual Management Boards.

Benefits

- + Cost effective method of creating a new custom printed whiteboard
- + Easy to attach and remove from your current whiteboard
- + Fully custom printed whiteboard solution
- + No need to throw away boards or stands
- + Allows you to continuously move forward

Uniformity with Flexibility

↳ Custom Printed Header Boards

Global companies may have different size factories with different needs. The header boards allow you to set a standard across all divisions. Use magnetic headers and accessories to create your own boards. Magiboards can help you design and will supply all your magnetic accessories.

Benefits

- + Gain cost savings on larger print runs which can then be tailored to individual needs
- + Headers available with dye sublimation or magnetic backed vinyl
- + Full range of standard & custom accessories available

Early Stages & Fluid Processes

↳ Plain Boards & Accessories

In the earliest stages of your Lean journey your Visual Management tools may be very fluid. If that is the case, why not start with a blank canvas using the various tools Magiboards can offer to create a fully flexible Visual Management board. Magiboards can offer a wide range of magnetic headers, document holders, charting and magnetic tape, magnetic indicators etc.. to help you set up and test your design. Once your design is finalized, you can order a replacement whiteboard sheet which will sit snugly over the plain board without the need to remove the board from the wall or replace expensive mobile stands.

Benefits

- + Create your own totally customizable whiteboard
- + Low cost custom whiteboard solution
- + Experiment with new board layouts / designs at minimal cost by using Magiboards accessories

Our Printing Process & How to Order

Our Printing Process

We use a process known as 'dye sublimation printing'. Dye sublimation printing is a process whereby a negative of the image is printed on special transfer paper. The ink is then heated to a gas in a heat transfer press and absorbed into the surface of the magnetic dry erase whiteboard. The graphics are embedded in the whiteboard. This gives huge benefits over other printing methods, such as:

- **High quality print**
- **Totally smooth, clean surface**
- **Easy to keep clean and offers a longer life span**
- **Significant quantity discounts available**
- **No vinyl overlays - Ideal for food manufacturers, hospitals and other environments where cleanliness and reducing the risk of germs is high priority**

How to Order a Custom Printed Whiteboard

Creating and ordering your own custom printed whiteboard has never been easier! We've created this simple 4-step guide as a path through the process. With high quality print, a 10 year surface guarantee there's never been a better time to create your own custom printed magnetic whiteboard,

STEP 01

Simply send us the size board you require and quantity, along with a brief description / sketch / mock up of your design

STEP 02

You will receive a quotation for your order, including artwork generation, digital proofing and the cost of delivery

STEP 03

Having approved the quote and placed your order, we will then create your artwork and send you a digital proof for approval or revisions. There are no additional costs at this stage

STEP 04

Upon approval of the digital proof, your order will go to production. There is a lead time of 3 - 4 weeks from sign off of the digital proof. **Get ready for delivery!**

Replacement Whiteboard Sheets

How does it work?

The lean journey demands **change for the better**. As your lean partner, we understand this. That is why we offer a replacement magnetic whiteboard sheet which can sit neatly over your whiteboard.

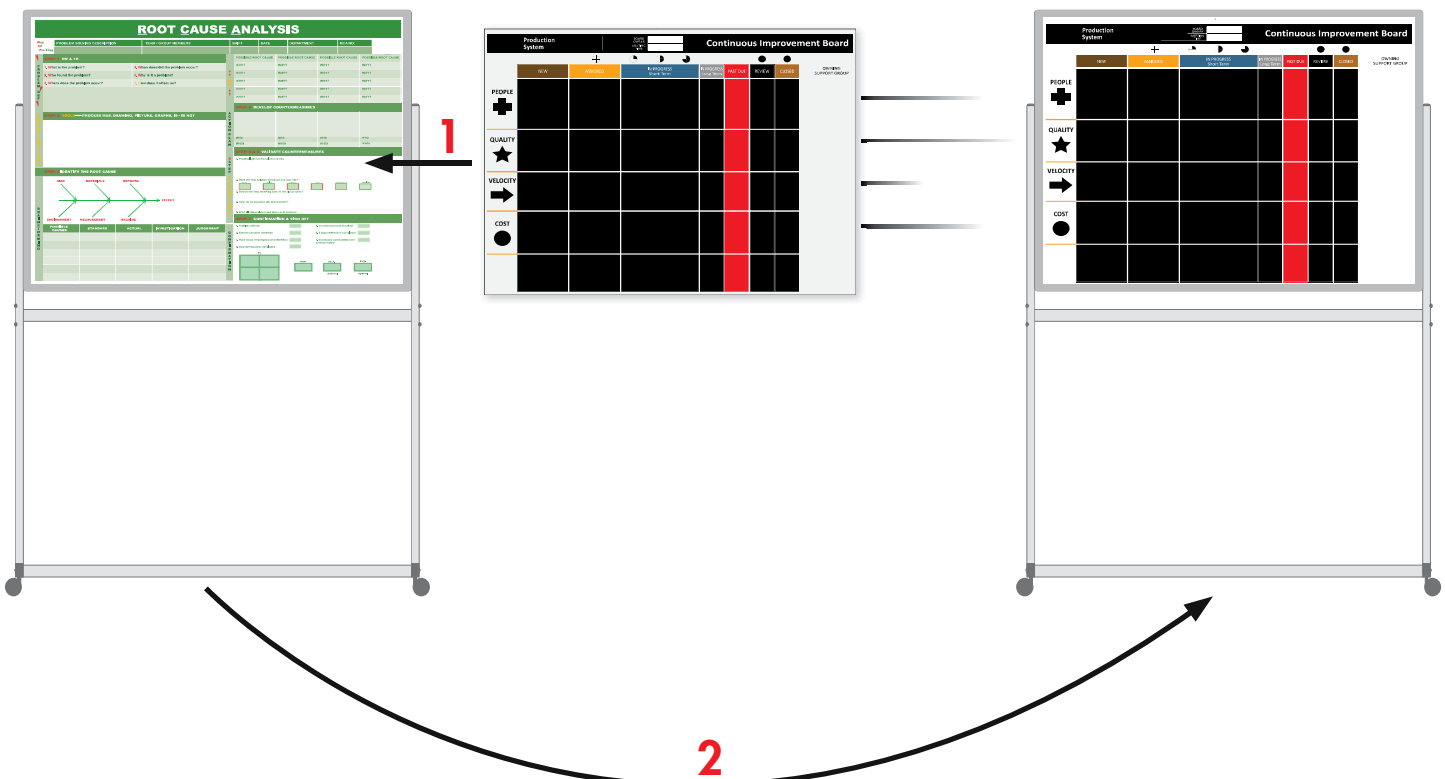

- Update your graphics with little effort
- The magnetic backing simply mounts over your existing Magiboard in seconds
- No drilling or stress
- Avoid waste

What is the Replacement Sheet made from?

- A magnetic sheeting
- Vinyl laminated to the magnetic sheet and printed with the new layout
- A clear dry erase film laminated over the printed vinyl

The Benefits

- Cost effective solution for updating your custom printed whiteboard
- Totally smooth, easy to clean surface
- Accepts magnetic accessories
- Excellent dry erase surface
- Clear and long lasting print
- Quantity discounts available on larger runs

Case Study

Element Materials Technology element

Element Materials Technology is one of the fastest growing companies in the global Testing, Inspection & Certification sector. Element is active in over 30 countries and has nearly 200 laboratories.

Stage 1: Trial Period

Magiboards works with one UK site to produce a range of custom printed whiteboards for the CI department. Artworks are created and signed off prior to production.

Stage 2: Roll out in UK and Europe

The range of designs and accessories is extended. Magiboards creates a custom area on their website where any facility can register and then access their products to buy online. Stocks are held at Magiboards for order fulfilment.

- **Uniformity of design**
- **Economies of scale**
- **Ownership by each local site**
- **Easy management overview of development of Continuous Improvement plan through the company**

Stage 3: Roll out to USA, Canada and ROW

Magiboards sets up joint venture in the US with a manufacturing partner, creating a Magiboards USA website and stock products for local shipment and purchase in US dollars.

- **Improved customer service levels**
- **Reduction in lead times**

What have we learned?

A global company may have many different size plants with different needs. A flexible approach is required without compromising on quality. The larger sites have room for larger boards. These can be fully printed in quantities and have top quality with economies of scale.

For smaller sites we adopted a more flexible approach with the introduction of small size multi-purpose boards which use different magnetic printed headers and accessories to create multiple outcomes.

Flexible working boards mean that economies of print run are still available and global guidelines are still followed. As both companies move forward in the process, we are creating magnetic back dye sublimation sheets which can sit on top of existing boards without the need to replace boards or have new stands.

Magiboards acts as a partner to us in our Lean journey. They are responsive when we need new designs and effective in helping us define the appropriate supply chain to delivery the right products to Element sites.

Christiaan Verhoeven
Group Operations Excellence Director
Element Materials Technology

Wall Mounted Whiteboard Solutions

COATED
STEEL

Available with a magnetic coated steel surface, wall mounted magnetic whiteboards are an essential tool in any office, manufacturing or lean environment. With the choice of 6 standard sizes or the option of a made-to-measure board as well as a choice of single or double sided, we're sure our range configurations will meet your specification.

Features

- Dry erase surface which accepts magnetic accessories
- Choice of a single or double sided whiteboard
- Standard sizes & custom sizes available
- Can be wall mounted in landscape or portrait orientation

Custom Printed Dye Sublimation Whiteboard

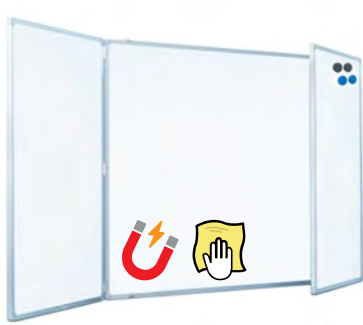

Custom Printed Header Whiteboard

Plain Magnetic Whiteboard

Size (feet)	Plain	Printed

2 Wing Whiteboard

Folding Whiteboards with Hinged Wings

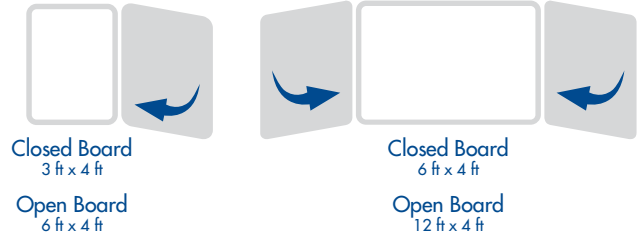

Folding whiteboards are ideal for use in areas which are tight on space, or in areas where you may need to temporarily hide sensitive information from public view. Our range includes whiteboards with 1 or 2 wing configuration with a coated steel surface. This product is also available on a mobile stand with a 2 wing configuration, [see page 21](#).

FEATURES

- Dry erase surface which accepts magnetic accessories
- Choice of 1 or 2 wing configurations
- Small discreet magnets keep the wing in place when closed
- Standard sizes & custom sizes available
- Sizes quoted are with the wings closed
- 1 Foot wide mini wings are also available

Example size diagram

Revolving Mobile Whiteboard with Stand

Our revolving mobile whiteboard is fitted to a sturdy mobile stand with lockable wheels and can be supplied as a single or double sided whiteboard. Mobile stand whiteboards offer you increased flexibility by way of allowing you to share a whiteboard with another office or work station, which can improve work flow and help collaborative projects.

Features

- Choice of a single or double sided mobile whiteboard
- The board rotates through 360 degrees
- Locking handle to fix the board firmly in place
- Supplied with non marking glide easy wheels, 2 of which are lockable
- Boards with 1 side print have a plain, magnetic, dry erase whiteboard on the reverse

Fixed Mobile Whiteboard with Stand

Our fixed mobile whiteboard is fitted to a sturdy mobile stand with lockable wheels. Unlike the revolving whiteboard, this whiteboard is fixed in place and ideal for double sided board designs, using Tabloid & Letter paper holders.

Features

- Choice of a single or double sided mobile whiteboard
- The whiteboard is fixed in place on the mobile stand
- Supplied with non marking glide easy wheels, 2 of which are lockable
- Custom sizes available
- Boards with 1 side print have a plain, magnetic, dry erase whiteboard on the reverse

Folding Whiteboard with Hinged Wings on Stand

Mobile whiteboards with hinged wings are supplied on a sturdy, mobile stand with lockable wheels. The addition of 2 centrally opening wings gives a total of **5 surfaces** to write on. The wing sizes are half the width of the board x the height of the board.

Features

- 2 Wing configurations with 5 whiteboard surfaces
- Dry erase surface which accepts magnetic accessories
- Small discreet magnets keep the wings in place when closed
- Standard sizes & custom sizes available
- Supplied with non marking glide easy wheels, 2 of which are lockable

Rotating 3 Sided Whiteboard with Stand

Our 3 sided whiteboard rotates through 360 degrees and is fitted to a sturdy central pole and flat base. Often referred to as a 'Huddle Board', these boards are ideal for information points and production environments. Each whiteboard side measures 2 ft x 4 ft, width x height.

Features

- 3 Sided whiteboard solution
- Each whiteboard measures 2 ft x 4 ft w x h
- The board rotates through 360 degrees
- Powder coated steel circular base, 2 ft in diameter
- Available with 5 x heavy duty wheels attached

Large Cut & Join Whiteboards

Are you looking for a cost effective large magnetic whiteboard that is bigger than 8 ft x 4 ft? Magiboards very often supplies **cut and join** magnetic whiteboards. With its unique white aluminum one frame surround and link-able panels, we can achieve wall to wall coverage. The boards are joined together with a discreet 0.4 inch wide 'H' section joining piece, made from anodized aluminum. Custom printing is available on the coated steel surface.

- Create a large whiteboard size suitable for you
- Easy & economical to transport
- Looks professional with a one frame surround
- Allows for large whiteboard solutions to get through doors and corridors
- Available with top quality coated steel surface
- **Custom printing available on coated steel surface**

Coated Steel Whiteboards

With its 10 year surface guarantee, our magnetic coated steel whiteboard is the best in its class. Compatible with all our magnetic whiteboard accessories.

- Accepts all magnetic accessories
- 10 year surface guarantee
- **Custom printing available**

Simple & Easy Installation

Your large magnetic whiteboard will arrive in pre cut whiteboard panels with the frame already attached. The H section is also attached to one of the panels for easy installation.

Lean Whiteboard Accessories

We supply a huge range of accessories to complement your visual management whiteboards and notice boards. From writing and erasing accessories to paper holders and magnets / magnetic indicators, our range is wide and diversified to offer you the best accessory choices. Custom options are available.

Document Holders

Solo Magnetic Document Holder Window Frame

Magnetic document holder windows are great for keeping papers in place and preventing unwanted tampering, as well as give a professional look to your whiteboard. There are magnetic strips on the back of three of the borders which allows for the paper holder to stick to any magnetic surface and also means that putting in the sheets and taking them out is a very simple operation.

Size	Quantity	Color	Code

Custom Printed Magnetic Accessories

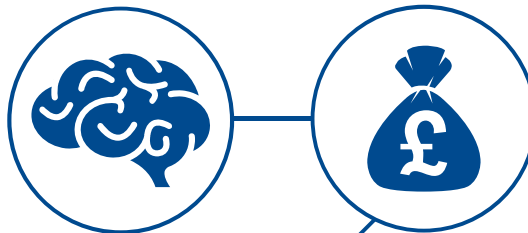

Any Size • Custom Designs • Custom Shapes

Create your own custom printed magnets with us! Create any size, any design and any shape magnet to suit. Full color printing available with an optional dry erase finish.

- Custom design to your specification
- Create magnets in any size for any quantity
- Optional dry erasable finish

Step 1:

Simply let us know what size magnet you require, the quantity you will be ordering and a short brief / sketch / mock up of your design and we will handle the rest.

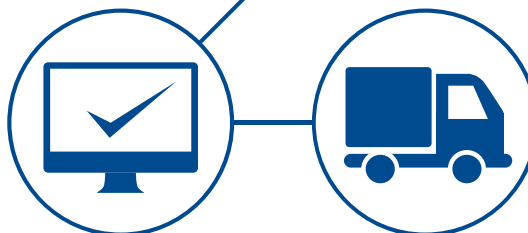

Step 2:

We will then send you a tailored quote based around your proposed specification and order quantity

Step 3:

After approving the quote and confirming the order, Magiboards will make a PDF proof for you to sign off (or amend) before the magnets go into production.

Step 4:

Following approval of the proof, Magiboards will then produce and deliver your magnets to you. Just like that, you will have your very own custom printed magnets

Custom Printed Magnetic Headers

Created using a vinyl material with a magnetic backing, we can make special custom magnetic headers to suit your board design. Our graphic designers will work with you on sizing and design so your lean board works perfectly for you.

*Example printed header design

Magiboards 

WHAT OUR CUSTOMERS ARE SAYING

I have found dealing with Magiboards a very pleasant experience. It all went very smoothly from quoting, digital proofing, through to receiving the boards at our sites throughout the UK. The boards are of excellent quality and come with a 10 year guarantee, which is a bonus as they will get used a lot. The printing is very clear and they are easy to keep clean.

- Orhan Z

We were really impressed with the whiteboard that you produced for us. The service was brilliant and the sales team was extremely helpful.

- Gemma B

Just like to say thank you for a great job on the boards, they look fantastic!! I will be in touch soon to place an order for custom board magnets

- Neil P

The whole team think our Safety, Quality & People Development custom printed boards look great and we are looking forward to starting phase 2 with Magiboards.

- Andrew W

Great service, thank you. Boards have been effective when implemented and we are looking at other designs to control other areas of our business. We will be looking to do more business with yourselves to support our needs.

- Peter S

As a returning customer to Magiboards, I am very happy with the custom printed whiteboard that you designed for me. It is excellent quality as ever and I already want to order another board.

- David R

I am very pleased with the boards we have received from Magiboards. Auditors have commented on them and our C.I Manager wants to use you to build our DMS boards in the near future.

- Martin H

Magiboards are '5 Star' as reviewed on Google
