

# Oversized Magnetic Whiteboards

The advantages of a full wall whiteboard are apparent. It is part of the business culture today that the conference room will have an extra-large whiteboard that covers most of the wall.

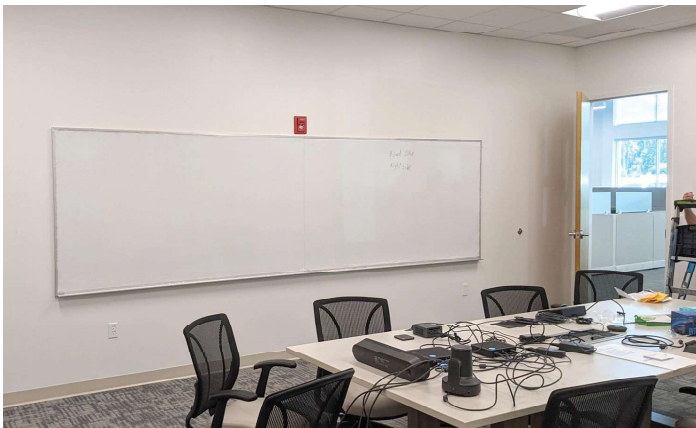

Our whiteboards can be plain or custom printed with a high-quality dye sublimation process.

4' x 8' is the largest size for a seamless whiteboard. Anything larger can be assembled in-house and shipped. Because of shipping costs for anything over 90\"

## We treat every Oversized Whiteboard as a Custom Project!

Splice and Join System is a popular choice for oversized whiteboards. We can manufacture the whiteboard panels in any size up to 4' x 8'. These panels are assembled on site to your custom specifications.

The benefit of this system is that it reduces the size of the packaging therefore reducing shipping costs. When delivered, the boards easily install by connecting the boards together that creates a hairline butt seam.

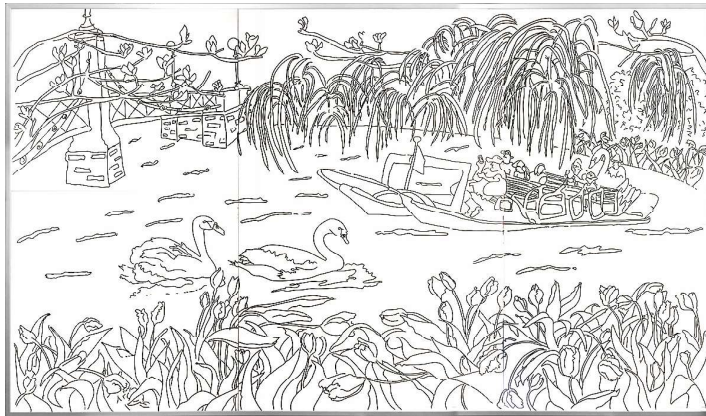

Two 8'x4' joined to make a 16'x4'

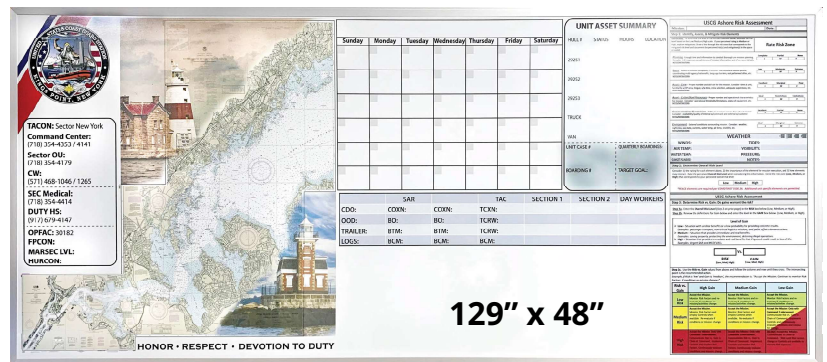

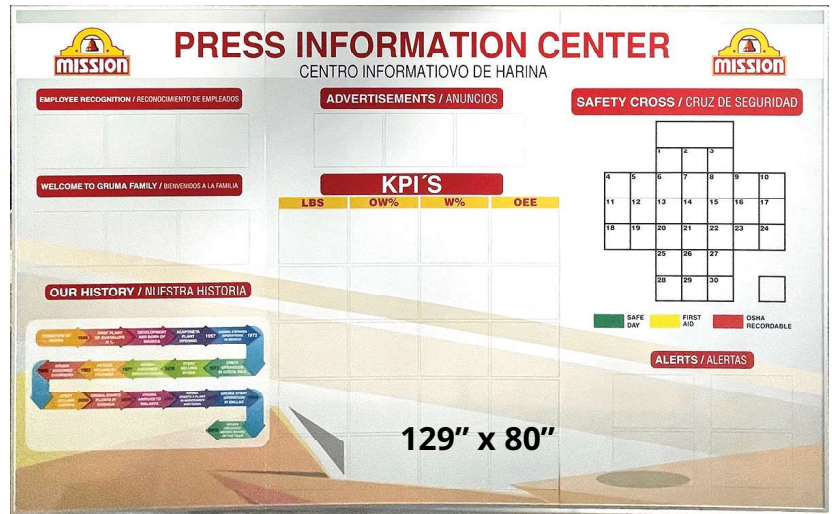

96" x 48"

140" x 86"

129" x 48"

129" x 80"

## The Many Benefits of Magiboards Custom Oversized Magnetic Whiteboards:

- Create a large whiteboard size suitable for your needs.
- Looks professional with our clear anodized aluminum framing.
- Allows a very large board to get through doors, corridors and elevators.
- Maximum 8 ft. height, the width can be as wide as you like!
- Lower shipping costs than sending a pre-assemble extra-large board.
- Accepts all magnetic accessories.
- Available with top quality magnetic dry erase writing surfaces.
- We can customize with your graphics with a dye sublimation printing process to embed the graphics into the dry erase surface. This process produces a very professional finished look that resists chipping and fading.
